Duluth Minn., June 13. — At the opening of a hearing called by the federal trade commission here today to take evidence on the effect locally of what is known as the "Pittsburgh-plus" practice of price fixing on steel, representatives of local business houses and manufacturers were called to the stand. They testified that they d been the object of price and trade discrimination by having to pay freight from Pittsburgh to Duluth on steel manufactured here in Duluth, or at the various steel mills in the middle west. The hearing is one of a series being conducted by the commission throughout the country.

Representing the Duluth interests were G. H. Spear, a local attorney, and H. G. Pickering of Superior. K. E. Steinhauer, attorney for the trade commission, represented Lhat body while W. W. Corlett and W. M. Clark were attorneys for the steel

That the practice of "Pittsburghplus" prevented expansion and limited sales by increasing overhead charges, it was charged in the testimony of Otto Swanstrom, president of the Diamond Calk Horseshoe company of Duluth. Because of this practice, which, he said added an imaginary freight rate cost of \$13.20 a ton to the steel that his firm purchased, the market of its product was being restricted and it could not compete on a prohtable basis with eastern manufacturers.

Mexico City June 14.—Mexico City is
without street car service today, the bakers are not working and the suspension of the light, power and water supply services was expected momentarily this morning as a result of a strike initiated by the street car men shorly after midnight. Elaborate precautions have been taken to prevent violence.

LASKER MAKES HOT REPLY

(Continued from Page 1) "I believe you to be thoroughly sel-fish and that you are acting in the hope of creating a public revolt against prohibition so that you may again revive the sale of your liquors, utterly regardless of how you might hurt the American merchant marine in your effort to create a situation to

benefit your brewery.

"It is, of course, notorious that the Adolphus Busch who founded your brewery was possibly the Kniser's closest friend in America and that your family for many years has maintained a castle in Germany; your action in any event will not displease your German friends whose greatest hope of a restored German merchant marine is in a hurt to America's new

born merchant marine.
"I refer to these extraneous facts not in resentment, but that it may be made clear that in my opinion you cannot come before the bar of public opinion with clean hands."

Makes Public Opinion

Mr. Lasker made public at the same time the text of an opinion just rendered to him by Elmer Schlesinger, general counsel of the shipping board, upholding anew the legality of the serving of liquors on American ships liquors on American ships serving of liquors on American ships liquors on American ships liquors on American ships liquors of the liquors o at sea. The opinion was based largely on the limitation in the Eighteenth amendment of its operation to the United States and all territory subject to the jurisdiction thereof and on recent rulings of the supreme court prohibition laws to be effective "throughout the entire territorial limits of the United States."

The opinion cited numerous cases to show that Americans ships outside the three mile limit could not be considered within the jurisdiction of the United States government.

Washington, June 14. — Announcement that he would offer an amendment to the ship subsidy bill providing that no part of the federal ap-propriation shoud be allowed steam-ship lines on which liquor was sold without special authority of congress was made today by a western Repub-lican member of the house, who de-clined to permit the use of his name at this time.

Reports were current around the house that a number of similar amendments were being prepared by prohibition leaders, who agreed that if put to a vote it would be passed by the same majority recorded heretofore on all straight wet and dry issues, thus settling, until a possible enment during 1920 increased by decision by the supreme court the

Businessmen and Farmers Join In Movement Launched at Dunn Center

Dunn Center, N. Dak., June 14-The Dunn Center Chamber of Commerce at its first meeting inaugurated a fullblood cattle campaign. Businessmen and farmers in this section have real ized for some time the vital need of improvement in the milk strain.

Heretofore grain farming and beef raising has been he slogan in Dunn County, but the partial crop failures experienced during the past three or four years has brought the farmers to realize the importance of diversifying. But they have also learned from his experience that corn and hay crops can be depended upon.

Dunn County today has some of the finest beef herds in the Northwest, especially in the badlands territory, but the day of the cattle game for beef only is a thing of the past throughout the farming section.

The Chamber of Commerce has called a meeting of business men and farmers at the Auditorium on June 12 for the purpose of electing a delegation to go to the Holstein fair at New Salem on June 22.

O. N. Dunham, president of the Dunham Lumber Company, was a suest at the Chamber of Commerce neeting and gave a very interesting address on the importance of the full-blood cattle game.

STEGNER OPENS CAMPAIGN; HITS LEAGUE, I. Y. A.

Candidate for Governor Says He Is Against Sham of State Socialism

Devils Lake, June 15.-Years of bitter controversy and propaganda have warped the vision and unsettled the political convictions of most of the voters of North Dakota, H. L. Stegner, candidate for nomination as governor, declared in a meeting here last night. Mr. Stegner made common enemy of all political opponents in outlining his reasons for asking for the franchise of his fellow voters. The meeting was in the court house.

"The orgy of socialism has not ceased," he continued, "but there is evident everywhere a desire to hear the issues discussed and a more tolerant atti

"The turn in the road has come when we are confronted with two al ternatives; to continue the costly experiment of state socialism or eradicate it root and branch to that end that ruinous taxes may be eliminated i and the people of this state be led out of a tax bondage into which the polifical whiles of both the Nonpartisan Langue and the I. Not Seeking Plunder. "I appeal to those who desire to make a fight for principle rather than for offices and for political plunder If nominated and elected, I pledge to work for the immediate abolition of the State Industrial program and will lend what influence I can as governor to the summoning of a constitutional convention to rewrite the organic law of our state and restore the same representative government and eradicate every vestige of socialism from its

state constitution. "The position of Nestos and the I. V. A. reminds me of the story of the small boy who answered the advertisement: Wanted small boy to work part inside and part outside," said Mr. Stegner. "He applied but asked his employer this question, what do I do when the doors slam? Governor Nesinside policy on state socialism but he

HERBERT A. HARD

The Democratic nomination for Secretary of State in the primary is, being sought by Herbert A. Hard, state food control engineer. He has lived in North Dakota for 12 years. "I have always been a regular De-mocrat, and if nominated, my name will stand on the ticket until the No-vember election," he says. "I have never been in politics before and have never stood for elective office,

Would Expose Sham. "As a Republican I am opposed to the conspiracy to sell out the Republican party and elect Democrats to of fice and to place their henchmen in favored places under the filmsy guise of fighting state socialism when it is so apparent that the , V. A. program is Theory independent Republican and as socialistic, Utopian and impossible as socialistic, Utopian and impossible of successful fruition as that of the Nonpartisan league.

"This sham should be exposed and all Republicans who cherish the credit and fair name of this great state dan, died recently at Marshalltown. lows, according to information reshould rally to the defeat of socialism whether fathered by the I. V. A. bosses or League henchmen.

"I am opposed to delivering the state to the loan sharks and money barons of St, Paul and Minneapolls and deplore the recent utterances of Governor R. A. Nestos when, hat in hand, he waited in the outer lobbies of the great financial institutions of the Twin Cities to tell their officers that 'North Dakota is not broke.'

Stande On Platform. "Upon these issues and pledges l announce my candidacy for the Republican nomination for governor at the primaries, June 28th."

Mr. Stegner then discussed the tax problem of the state and read editorials from papers concerning the industrial program and warned his hear. ers that the day of payment was com-ing, declaring that \$45,000,000 has been spent since 1917. Referring to an editorial which declared that he was the candidate of "back to the woods" and accepting the slogan, he declared emphatically for conditions that existed prior to 1915, and concluded, "If you will be led by propaganda of the press, Mr. Baker will be your next governor. If

TO YOU WHO ARE LEAVING THE PUBLIC SCHOOLS

JUST HOW ANXIOUS ARE YOU TO GET AHEAD? Your ambition says you are willing to go to any honorable extreme, but it is by your actions that the world will know what you really are. The poorest workman in the hardest, lowest-paid job probably once had ambitions just as lofty as those you now entertain. But he failed to take any steps toward realizing those ambitions. He made plans, but he always put off making the start. He waited for a fortune to fall in his lap. He isn't waiting any longer. He realizes his mistake as he faces the daily treadmill of existence. It is now too late for him to turn back.

Lydia E. Pinkham's Vegetable Compound a Marvelous Help

West Orange, N. J.-"I was very nervous and upset for six months be-fore my baby was born. One of my friends told me to take Lydia E. Pinkham's Vegetable Compound and I have taken it for five months now. I have a big boy who weighed almost nine pounds at birth and i do all my work and don't feel a bit nervous or upset any more. I still take your medicine and have told all my friends what good it has done me."—Mrs. MARGARET GREGORY, 440 Valloy Road, West Orange, N. J.

West New York, N. J.—"The first west New York, N. J.—"The first two months I carried my baby I was in bed almost every day with sick headaches. I tried Lydia E. Chicago, Ill.—"I recommend Lydia E. Pinkham's Vegetable Compound for all prospective mothers. I suffered from weakness and faint spells and had to lie down twice a day for an hour or so before I could go on with my work. My cousin, who lives in Wisconsin, has used your Vegeta-ble Compound for over nye years and she came to us for a visit and she and came to us for a visit and she recommended it to me, saying she would pay for the bottle if it did not help me. I took that bottle and got more, as I found it gave me great relief. I recommend it to my friends and sisters and am willing for you to use these facts to help others."—Mrs. I. J. Kubinski, 1813 W. 17th St., Chicago, Illinois.

Lydia E. Pinkham's Vegetable Compound should be taken by expectant mothers. It will assist them in keeping well and strong. This is necessary not only for their own comfort but for the future as well. It helped these women. It has helped many others.

YOUR BODY

The materials, out of which your body is built would bring about 98 cents if they could be separated and sold in a drug store.

This is figured out by Dr. Georgine Luden, in the current Journal of the American Medical As-

The human body, according to Dr. Luden, contains iron enough to make an average-size nail, fat enough for seven bars of soap, lime enough to whitewash whicken-coop, sugar enough to fill a shaker and sulphur enough to rid a dog of fleas. In the brain is a minute quantity of gold.

The blood that circulates through your body would half fill an ordinary bucket, says Luden.

This blood is kept moving by the remarkable little pumping engine, the heart, which normally beats 103,650 times every 24 hours.

Mysterious organ, the heart. When it stops life is ended.

What makes it beat or stop beating? That is the riddle of life.

A doctor can write out for you a list of the chemicals or elements that make up your body He might give you the exact quantities of each You could go to a drug store and buy the list, mix the stuff together and say: "There is a duplicate of my body."

It all resolves itself down to simple elements.

And yet there is a difference between the drug store chemicals and the actual body. That differ ence is something that cannot be measured. It has no weight. It is invisible.

The spirit, which gives motion and consciousness to the chemical machine known as the human body, is something entirely separate and apart.

Our bodies are like railroad locomotives. The engine stands on a side-track, motionless, dead Coal is in the fire-box. Water waits to be turned into steam. The engineer (soul) steps into the cab, touches a match to the coal. Life begins.

As the coal burns up, more fuel-corresponding to food-is shoveled in. Gradually, despite repairs, the locomotive (body) wears out. It goes to the junk heap-death.

The engineer or soul, however, does not die with the locomotive. He merely moves over to another locomotive.

How much would you give to know what locomotive you will drive hereafter?

TELEGRAPHIC RECORDS

All telegraphic records are broken when Edmond Harriman of Tucumcari, N. M., receives 209 words, spelled out, in two minutes and 43 seconds. This happens at a convention of "knights of the key."

Twenty years ago, it would have created a national sensation. Today it gets only brief mention in the newspapers, being smothered by news about the new marvel, radio.

All marvels are comparatively short-lived, in our generation.

MONKEYS

Carveth Wells, explorer, while tramping in Malay jungles, found that the natives had trained broks, small monkeys to run up trees and pick cocoanuts for them.

That is interesting, because it happens far away.

But, shucks! In our country, the monkeys descendants have been trained to do "a hear sight" more than the broks.

You have noticed, in a circus menagerie, that the monkeys are just as interested in us as we are in them. That is one of the reasons.

PRE-NATAL

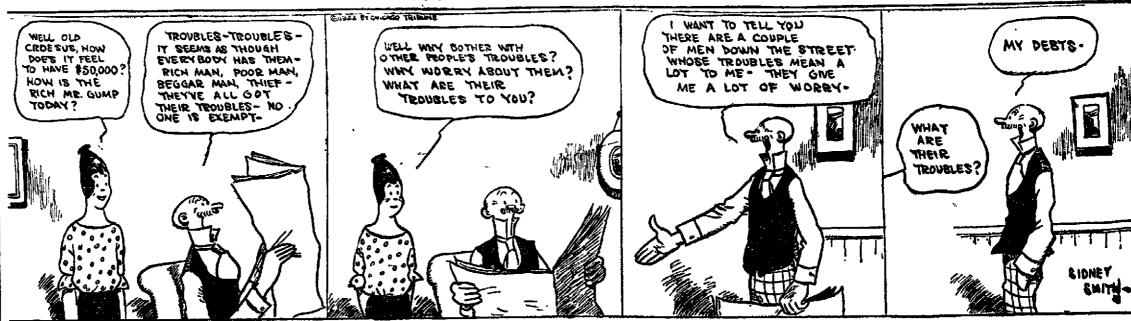

Parents can pick out their baby's career before it is born, says Dr. Alzamon Ira Lucas, talking to an eastern medical convention.

Doc has a nice little system. Parents merely select the desired vocation, then concentrate wil' power and desire on it, and work occasionally at the career they have in mind.

Whether this would work or not, even in occa-😘 sional cases, the best way is to let the child do its

own selecting slowly and in the natural way. Failure nearly always is due to following the wrong line of work, usually at the instigation of parents.

THE GUMPS-HE SHOULD WORRY!

RADIO

How far will this radio craze expand? Alexanler Eisemann, president of National Radio Champer of Commerce, estimates 1,500,000 home radio outfits are now in use in our country.

Eisemann considers it probable that this will ncrease to 6,000,000 in five years.

America seems to be an industrial Pandora's Box with unlimited number of surprises. The adio industry, which expects to do \$100,000,000 business a year, sprang up unexpectedly. Don't worry about opportunities becoming fewer in America. New ones are born, every tick of the

BREAKING DOWN THE OLD LINE

The action of the Canadian government under Premier Mackenzie King, rejecting the United States proposal for negotiation of a treaty under which the St. Lawrence seaway could be constructd, suggests an interesting new development in nternational politics. For a century and a half the international political thought of the United States and Canada has been divided by a more or 'ess direct horizontal line from the Atlantic hrough the great lakes to the Pacific. Now sudlenly it appears about to be divided by a vertical parrier, running approximately at right angles to he international boundary, or through the two reat American scaports of New York and Mon-

The possible effect upon international relations of such a change in the dividing lines of internaional thought is unlimited. Both Canada and the United States will do well to consider it seriously pefore allowing the seaway project to be shelved that are bound in Morocco. hrough the selfish opposition of present seaport

The Mackenzie King government of Canada reects the seaway treaty project because of water at his feet. The modern man has power and port interests centered in Montreal, and because it retains its majority in parliament only through the support of those interests. This outs Eastern Canada in direct opposition to the est welfare of Western Canada, which is as eager 'or a through water route for its great agriculural products as is the Middle West of the United States. It makes the interests and purposes of Nestern Canada and Middle Western United States one and the same. It tends to break down he old international boundary which has divided he political thought of the two countries.

At the same time New York opposition, for the ame selfish reasons, drives the Middle West to 'o-operate with Western Canada in thought and fort for the seaway. New York and Montreal are building a barrier against expansion and derelopment of the interior of the continent. In Canada that barrier runs approximately along ide water, while in the Eastern United States it 's bounded on the east by the New England states, vhich favor the waterway but the zones for and against the improvement are well defined in both countries, and in each case, for and against the mprovement, they cross the international boundary and unite the residents of each zone in comnon thought and purpose with regard to this im-

It proves the economic oncness of the two counries. Just as fear of financial loss through the competition of potential new water power and of ake ports, which would take shipping away from he present great seaport, moves financial intersts in the province of Quebec and the state of New York to oppose the seaway, so promise of inancial benefit will solidify the rest of the two countries in favor of it. Such strong economic 'nfluence will tend more and more to break down olitical differences in the regions affected. Eventually it might mean a political upheaval.

The St. Lawrence seaway is such a natural, logcal, economic necessity that it cannot be thrust uside by the political machinations of an elective For man, to dumb forgetfulness a government. It has not been killed by the Canadian premier's action. The new division of inernational thought which it induces eventually vill make that clear in both countries. We will have a scaway .-- Chicago Tribune.

TODAY'S WORD

Today's word is DAIS. It's pronounced—day-is, with accent on the first syllable, or daze. It means—a platform above the floor of a hall or large room, to give distinction or prominence to those occupying it; especially, the platform of a lecture room or church.
It comes from—Old English, "deis

les," a table.
It's used like this—"For the wedling ceremony, King Alexander Serbia and Princess Marie of Ru-mania, who were married recently at Belgrade, knelt on a dais before the altar in the cathedral."

EXCESSIVE HEAT REPORTS, BOOSTS WHEAT PRICES

(By the Associated Press)
Chicago, June 14—Reports of excessive heat in the southwest and northwest Kansas led to speculative buyfeatured the further spirited rally of prices in the stock market at the opening of today's session.

New York entral, Canadaian Pacific wheat was turning white as a result.

on the better outlook for the adjustment of that country's external debt, rising 4 1-2 to 5 points in the early dealings.

Corn and oats were firmer with wheat. After opening a shade to 1-4 to 3-8c higher, July 60 3-4 to 61c, the corn market scored slight gains. Oats started 1-8 to 3-8c and 1-2c

Oats started 1-8 to 3-8c and 1-2c lower, July 34 to 35 1-4c and later hardened on all deliveries.

Higher quotations on hogs gave strength to the provision market.

Additional gains in price were scored later, western Nebraska reporting temperatures of 104 yesterday, and crop experts saying winter wheat was at a stage susceptible to serious damage especially from premature ripening in parts of Kansas, Missouri and Oklahoma. Renewed attention was also given to hlack rust reports from North Dakota. The close was strong 1% to 2% net higher, with July \$1.12% to \$1.13.

BRAVES FIGHT DESPERATELY

Humbled Pirates For Third Time In Four Games 8-5

GIANTS AND TIGERS WIN

(By the Associated Press) New York, June 14.-The Braves may not duplicate this year their rethey fought their way from the celership. lar to the top, but now they are staging a drive reminiscent of that feat. Hank Gowdy, hero of the 1914 champions was a hero again yester-

day when the Braves humbled the Pirates for the third time in four games 8 to 5. The Hub men, although still in seventh place, are only three games from the first division. The Giants meanwhile, outslugged

Cincinnati for their fourth straight victory over the reds, 7 to 5, and had a margin of four games over the Pi-

rates.
Philadelphia's International league recruit, Singleton, blanked St. Louis in the National league, while his mates clubbed out 16 hits for 14 runs off four Cardinal hurlers and Brook lyn bowing before the Cubs and Alexander's pitching prowess 8 to 3. Char ey Robertson of the White Sox came close to duplicating his nohit feat when he held Boston to two safe blows, the first of which came in the eighth and won 5 to 0,

Mauling Shawkey, Murray and O' Doul for 16 hits and a 13 to 4 victory, the St. Louis Browns obtaine an even break in the series with th Yankees, George Sisler leading the attack with four hits, including tw

Ty Cobb with two doubles and single, blazed the way for the Ti with Washington, 5 to 1, a homeru by Harris saving the Senators from a shut out.

SPEAKING OF HITTERS, HOW 'BOUT JAKE

Jake Daubert, first baseman of th Cincinnati Reds, at 37 years of ago is making all the younger players i the National League sit up and take no tice when it comes to consistent hitting this year.

nubert this season got away to the worst start any major leaguer has made in years It was on his twenty-sixth time at

bat in his eighth game of the season that he made his first hit of the year Once he started, though, the old boy didn't know when to stop. He erased his seven-game slump with a streak on which he hit safely in 22 consecutive games, making 32 lits in 77 times at bat in those games,

Charley Ebbett, owner of the Brooklyn team, and a man who doesn't bear Daubert very much love, was west with his team when Jake was getting his streak around the 20-game mark. grounds.

Ebbetts offered a hat to any Brooklyn pitcher who would stop Jake. Len Cadore and Al Mamaux did it on May 15 and Ebbetts had to buy two hats But they stopped Jake for only one day. May 16 was an open date and May 17 he was off again on anot les streak which lasted six games and in which he made 12 hits in 29 times at

He then was stopped for one day after which he started a third streak which numbered 14 straight games and on which he made 27 hits in 60 swings.

Of 44 games Daubert has hit safely in 42. His hitting has been timely, too, and has played a big part in changing the Reds from the cellar outmarkable achievement of 1914, when fit to a contender for he league lead-

Why Standard

Company

Better Service

THEN you drive up to a Standard Oil Company (Indiana) Service Station you find a man in charge who is competent, quick, agreeable - at your service. The farmer finds these same qualities in the man who drives the dark green tank wagon to his door.

If you were to enter any one of the refineries of the Standard Oil Company (Indiana) you would be astonished to note the air of absorption with which each employee is devoting himself to

The same interest may be observed at any point where you come in contact with employees of this Company. This condition is not a matter of mere hapening — chance. It is pecause the Standard Oil Company (Indiana) recognizes the fundamental interest of labor in the business to which it is devoted.

Throughout the years, it has been the continued policy of this Company, to compensate its employees fairly; to give them steady work; to insure them so far as it is possible against unemployment.

To protect the employee who has, grown old in the service, the Company has devised and put into effect an annuity plan whereby the employee who has given his best years, or who has become incapacitated in the service, is insured an income for the balance of his life. In no case is this annuity less than \$300.00 a year and it may be as high as 75 percent of his average yearly wage for the ten years preceding retirement.

This policy gives the employee a sense of security respecting his future. It enables him to do better work and gives him a more vivid interest in his work.

Long experience has convinced the management, the employee, and the stockholder of the Standard Oil Company (Indiana) that this policy of rec-ognizing the rights of the employee is one of the factors which enables this Company to give to the public a superlative grade of service in the manufacturing and distributing of petroleum products.
